Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 28—34, 36-39, 82-88, 90, and 91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lasher et al. 5,771,657 in view of Schoonen et al. 6,230,927.

Lasher '657 discloses a method for filling a prescription order per claimed invention. Lasher '657 method comprises the consolidation of countable prescribed pill bottle(s) and non-countable medication package to fulfill a prescription order (column 3, lines 56-60). The method comprises labeling each pill bottle and verifying the prescription. The method comprises bagging the consolidated prescription order at the order consolidation and packing station (OCP). The method comprises printing patient specific literature at the OCP so that such literature can be included in the final packaging process. However, Lasher '657 is silent as to the specifics of the non-countable medication package being prepackaged and dispensed.

Schoonen '927 discloses a system and method for dispensing prepackaged medication per prescription order. The dispensing system comprises plurality of identifiable storage arrays for storing prepackaged medications. The dispensing system comprises a printer for printing patient specific information and instructions. The

dispensing system comprises verifying means to ensure the correct dispensing of a dispensed order.

It would have been obvious for a person with ordinary skill in the art, at the time the invention was made, to have provided to Lasher '657 with the prepackaged medication dispensing system and method of dispensing thereof, as taught by Schoonen '927, because it provides the dispensing of prepackaged medications to fulfill a prescription that includes countable and non-countable medications, as desired by Lasher '657.

Allowable Subject Matter

3. Claims 35 and 89 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
